# Rupin Munjal

+1 (289)-885-7368 | munjalru@sheridancollege.ca | Portfolio | LinkedIn | GitHub

## TECHNICAL SKILLS

**Languages**: Python, Java, JavaScript, TypeScript, Kotlin, C, C++, SQL, HTML/CSS, Bash Scripting
**Frameworks & Libraries**: React.js, Angular, Bootstrap, Tailwind CSS, Spring Boot, Express.js, Flask, NumPy, Pandas, Scikit-learn
**Developer Tools**: AWS, Node.js, Docker, Android Studio, MongoDB, Git, GitHub, RESTful APIs, Postman, Figma, Agile Development, JUnit

## EDUCATION

**Sheridan College**                                                                                          Oakville, ON
*Computer Systems Technology – Software Development and Network Engineering*          *May 2023 – Aug 2026*
- **GPA**: 3.84/4.0
- **Relevant Coursework**: AI/ML – Python, OOP – Java, Web Dev, Database Design & Implementation, Database Management, Cloud Networks, Computer Security, Data Comm, Enterprise Java, Mobile Web Apps, OS – Linux

**Indian Institute of Technology, Madras**                                                          Chennai, India
*Bachelor of Science in Data Science and Applications*                                          *Sep 2024 – Aug 2028*

## EXPERIENCE

**Full Stack Developer Co-op**                                                                   Sep 2024 – Present
*Samskrita Bharati*                                                                                   *Mississauga, ON*
- Developing fun and creative full-stack applications to teach Sanskrit as a language through engaging games and interactive features.
- Working with peers to brainstorm and develop creative elements that boost engagement and learning.
- Ensuring cross-platform compatibility and performance with modern web frameworks and technologies.

**Peer Mentor**                                                 Aug 2023 – Jan 2024 & Apr 2024 – Aug 2024
*Sheridan College*                                                                                        *Oakville, ON*
- Conducted workshops and outreach activities, helping over 30,000 students build academic and personal skills.
- Provided personalized support across departments, fostering student engagement and success.

## PROJECTS

**Mantra Match** | *Interact.js, JavaScript*                                                    Sep 2024 – Present
- Developed a drag-and-drop application to teach Sanskrit, featuring multiple levels and audio prompts for user interaction.
- Implemented an intuitive user interface allowing users to match images based on audio cues, enhancing the learning experience.
- Utilized Interact.js for seamless drag-and-drop functionality and responsive design across devices.

**Car Dealership** | *Spring Boot, Java, RESTful APIs, Docker*                              Jun 2024 – Present
- Developed a full-stack web application for a car dealership using Spring Boot and RESTful APIs, enabling efficient data management and user interactions.
- Utilized Thymeleaf for dynamic rendering and Docker for containerization, ensuring a responsive design and secure user data protection.

**Attitudes and Academic Success** | *Python, Pandas, Scikit-learn, Flask*                 Jun 2024 – Present
- Developed a machine learning model using Scikit-learn to analyze the impact of student attitudes on academic success.
- Utilized Pandas for data manipulation and preprocessing, ensuring high-quality input for the model.
- Created a web application with Flask to visualize results and provide user-friendly insights into the analysis.

## VOLUNTEERING

**Data Track Volunteer**                                                                        Sep 2024 – Present
*GLOCAL Foundation of Canada*                                                                       *Ottawa, ON*
- Assisting in data collection and analysis to support various projects across technology, news, and other sectors.
- Collaborating with team members to leverage data insights for enhancing user engagement and driving impactful project outcomes.
